

## POLYPRINT BOOSTER

Polyprint Booster for Printing.

### Summary:-

- POLYPRINT BOOSTER is a high-performance accelerant for the **fixation of dispersed dyes** prints on polyester during high temperature loop steaming.

### Advantages: -

- Ensures maximum **fixation and color yield** of disperse dyes during loop- steaming.
- Overcomes **speckiness problem** which is often experienced when using concentrated dyestuffs.
- Does not impair the brilliancy of bright colors and is unaffected by the type of thickener employed.

### Features: -

- Performs optimally across the entire range of dyes unlike several other accelerants which are dye-selective.

### Storage: -

- Stable when stored in normal storage conditions.

### Health & Safety: -

- Health and handling advice on these products is given in individual data sheets, available upon request.

<b>Type</b>	:-	Non-ionic
<b>Composition</b>	:-	Alkosylates: pale yellow liquid
<b>Solubility</b>	:-	Miscible in water with haze.
<b>Compatibility</b>	:-	Stable in hard water, acidic and alkaline print pastes. Compatible with all printing thickeners.
<b>Application</b>	:-	The recommended usage level in the print paste is 0.5 parts / 100 Parts of the paste for <b>optimum Fixation and color yield</b> during high-temperature Steam development.
