

POLYSCOUR CAAD

This is performance detergent formulation having multifunctional applicability in

Specification :-

Base	:-	It is a special formulation of anionic emulsifiers, special non-hazardous and non-flammable solvents and stain Releasing agents.
Composition	:-	Clear light yellow-brown liquid.
Nature	:-	Anionic
pH (Self)	:-	Weakly Alkaline
%NVC at 105°C/180*	:-	30% ± 1
Solubility	:-	Miscible with alkali
Compatibility	:-	Compatible with alkali
Stability	:-	Stable to alkali, hard water & acid
Biodegradability	:-	It is biodegradability

Advantages:-

- It is stable to high alkaline media.

Application:-

- 0.5% to 0.75% CAAD is good suggested. Processor can use CAAD with huge quantity caustic soda. One can do heavy weight reduction (W.R.) in scouring process with CAAD.

Note:-

The information and recommendations presented herewith complied with utmost care, but they cannot be extended to cover every possible case. They are intended only to serve as non-binding guidelines and may not be adapted prevailing conditions.
